Second-year IT student who graduated foundation *with honours at 17*. I co-led marketing for an app & web development startup, taking its Instagram from zero to a thousand followers — and now I'm *building my own AI products*. I optimise and streamline everything I involve myself in.

01 EXPERIENCE

Founder

LiftSenseAI · AI Product

2025 — NOW

- ◆ **LiftSenseAI** — AI-powered lift occupancy and cargo detection using sensors and computer vision. Leading product direction and development end-to-end, from concept through build.

➤ github.com/noWie2k/liftsenseai

Head of Marketing

Appscreated · App & Web Development

2024 — 2026

- ◆ Scaled the company's Instagram from scratch to **1,000 followers** with daily code snippets and short, digestible, informative content.
- ◆ Built and maintained relationships with **corporate clients**, acting as a key point of contact and managing expectations end-to-end.
- ◆ Produced graphic design assets for social channels and coordinated the marketing calendar across the team.
- ◆ Streamlined workflows and prospecting using **Figma, Apollo and Toggl** to keep delivery fast and organised.

02 PROJECTS

LiftSenseAI

PYTHON · COMPUTER VISION · SENSORS

AI-powered lift occupancy and cargo detection using sensor fusion and computer vision.

TriAgentLoop

PYTHON · AGENTIC HARNESS

Custom-built agentic harness that orchestrates multiple AI agents in a coordinated feedback loop. Co-developed, open-source.

03 EDUCATION
